H4 PTZ Camera Line

The new Avigilon H4 PTZ offers high performance with self-learning video analytics.

The H4 Platform

Avigilon continues to expand its H4 camera platform with the addition of the H4 PTZ (Pan-Tilt-Zoom) camera line. The new H4 PTZ combines high performance with self-learning video analytics, providing users the versatility, functionality and intelligence to proactively respond to events as they occur.

Powerful Image Quality and Video Analytics

The new H4 PTZ camera line is available in 1 and 2 megapixel (MP) camera resolutions, both featuring continuous 360° rotation, allowing operators to track activity in any direction and collect detailed video evidence.

With self-learning video analytics, Avigilon's H4 PTZ camera has the intelligence to notify operators when important events occur, then deliver a new level of performance and image quality when further evidence is needed.

KEY FEATURES	BENEFITS
Self-Learning Video Analytics	Detects and learns the home position scene upon initial setup and adapts to changes without manual calibration.
Up to 45x Zoom Capabilities	For high-quality, detailed images when zooming in.
High Frame Rate	Up to 60 frames per second (fps) for highly detailed imaging of fast-moving objects.
LightCatcher™ Technology	Collects significantly more detail from a low-light scene than other low-light cameras, to deliver higher quality color images with less image noise.
Ultra Wide Dynamic Range (WDR) Technology	Up to 120db performance captures details in scenes with both dark and bright areas.
Bandwidth Management	Uses Idle Scene Mode and patented High Definition Stream Management (HDSM)™ technologies to get exceptional image detail with minimal bandwidth.
